Information and ICT Security Policy and Guidance 2010/11

1 Status

This draft policy is recommended to schools and is based on good practice.

2 Purpose

The objectives of this Policy are to:

- Ensure the protection of confidentiality, integrity and availability of school information and assets.
- Ensure users are aware of and fully comply with all relevant legislation.
- Ensure all staff understand the need for information and ICT security and their own responsibilities in this respect.

Schools may wish to add supplementary information here regarding the school's values, vision and aims etc.

3 Consultation

At local authority level, comments have been sought from the following groups:

- Secondary school network managers
- ICT Advisers
- Information Governance Group
- Headteachers' ICT and eLearning Group

Schools may wish to add their own consultees to this list, eg key groups staff, pupils, Diocese

4 Relationship with other policies

as policies are written and reviewed at different times they should not contradict so perhaps noting other guides and policies here to enable a coherent approach.

Arrangements for monitoring and evaluation - a short statement suggested as it's easy to write a policy and forget to monitor or review it, so GBs need to be reminded that it is their responsibility and for this to be done within a framework of planned policy review via the GB's committees. In this case I have suggested in the forthcoming GB agenda item that the Health and Safety Committee do this and undertake the annual risk assessment.

5 Introduction to Guidance

Schools have made a significant investment in computer systems and networks and reliable ICT services are vital to teaching, learning and management tasks. In addition, schools manage personal and sensitive information.

All Shropshire schools have access to the Shropshire wide area network (WAN), providing them with access to corporate resources such as Samis and ResourceLink.

This wider access places a responsibility on all participating schools to ensure that their own local area network and the Shropshire WAN, as well as the personal information they manage, is not compromised by poor security and irresponsible user actions.

6 Definitions

“Information” means information in any format, eg paper, electronic, video, audio.

“Authentication” means the process of identifying an individual, usually based on a username and password, ie determining whether someone is, in fact, who they claim to be.

See Appendix D for definitions for Personal Data and Sensitive Personal Data.

7 Scope

This Policy is intended for all school staff, including governors, who have control over or who use or support the school’s administrative and/or curriculum ICT systems or data or handle other school manual (paper) and electronic data.

The Policy should be reviewed on an annual basis.

All users of the school’s ICT systems or data are also covered by this policy.

Model acceptable use policies are also incorporated as appendices to this document – see page 20. Those for learners, adults working with young people and the guidance notes for schools and governors are those originally issued by WMNet in 2009.

8 Responsibilities

8.1 The Governing Body

The Governing Body has ultimate corporate responsibility for ensuring that the school complies with the legislative requirements relating to the use of information and ICT security and for disseminating policy on ICT security and other ICT related matters. In practice, the day to day responsibility for implementing these legislative requirements rests with the Headteacher.

8.2 The Headteacher

The Headteacher is responsible for ensuring that the legislative requirements relating to the use of information and ICT system security are met and that the school's Information and ICT Security Policy, as may be amended from time to time, is adopted and maintained by the school. The Headteacher is also responsible for ensuring that any special security measures relating to the school's information or ICT facilities are applied and documented as an integral part of the Policy.

The Headteacher is also responsible for ensuring the requirements of the Data Protection Act 1998 are complied with fully by the school (see 3131).

In addition, the Headteacher is responsible for ensuring that users of systems and data are familiar with the relevant aspects of the Policy and to ensure that the appropriate controls are in place for staff to comply with the Policy.

Appendix K provides a checklist for headteachers.

8.3 Senior Information Risk Owner (SIRO)

The Senior Information Risk Owner (SIRO) is a senior member of staff who is familiar with information risks and the organisation's response. Typically, the SIRO should be a member of the senior leadership team in a secondary school and may be the headteacher in a primary school. The following responsibilities attach to the role of SIRO:

- They own the information risk policy and risk assessment
- They appoint the Information Asset Owners (IAOs) – see section 8.4
- They act as an advocate for information risk management

Additionally, the SIRO will be responsible for ensuring that:

- Suitable training for all users and documentation to promote the proper use of information and ICT systems is provided. Users will also be given adequate information on the policies, procedures and facilities to help safeguard these systems and related data. A record of the training provided through the school to each individual user will be maintained.

- Users are made aware of the value and importance of such ICT systems and data, particularly data of a confidential or sensitive nature, and be made aware of their personal responsibilities for information and ICT security.
- To help achieve these aims, the relevant parts of the Information and ICT Security Policy and any other information on the use of particular facilities and techniques to protect the systems or data will be disseminated to users.
- The SIRO will ensure that the practical aspects of ICT protection are performed, such as maintaining the integrity of the data, producing the requisite back-up copies of data and protecting the physical access to systems and data.

The SIRO may also be responsible for the school's ICT equipment and systems and will have direct control over these assets and their use, including responsibility for controlling access to these assets and for defining and documenting the requisite level of protection.

In line with these responsibilities, the SIRO will be the official point of contact for ICT or information security issues and as such is responsible for notifying the Headteacher or Chair of Governors of any suspected or actual breach of ICT or information security occurring within the school.

The SIRO or Chair of Governors should ensure that details of the suspected or actual breach are recorded and made available to the Council's Information Governance team upon request. The SIRO or Chair of Governors must advise the ICT Services Help Desk (01743) 252200 of any suspected or actual breach of ICT or information security immediately.

It is vital, therefore, that the SIRO is fully conversant with the Information and ICT Security Policy and maintains an up to date knowledge of best practice and follows the associated approved practices.

The school's Senior Information Risk Officer (SIRO) is

8.4 Information Asset Owner (IAO)

Schools must identify their information assets – including personal data for pupils and staff, assessment records, medical information and special educational needs data, for example – and for each one, identify an information asset owner. The role of the IAO is to understand:

- What information is held and for what purposes
- How information has been amended or added to over time
- Who has access to protected data and why

An information asset is regarded as the collection of data or an entire dataset. It is important to distinguish between an information asset and the information (usually a subset of the asset) that needs protection. For example, reports run from an information asset, such as SIMS, are not information assets themselves.

There should be an IAO for each asset or group of assets as appropriate. For example, the SIMS database should be identified as an asset and should have an IAO.

The IAO is responsible for managing and addressing risks to the information and ensuring that information handling both complies with legal requirements and is used to the full to support the delivery of education.

The school's Information Asset Owners are:

8.5 Audit Services

The Audit Services section of the Council is responsible for checking periodically that the measures prescribed in each school's approved Information and ICT Security Policy are complied with, and for investigating any suspected or actual breaches of ICT or information security.

Specialist advice and information on ICT security may be obtained from the Schools' IT Support Service (SITSS), or the Council's Information Governance team.

8.6 Users

All users of the school's ICT systems and data must comply with the requirements of the School's Information and ICT Security Policy.

Users are responsible for notifying the SIRO of any suspected or actual breach of ICT security. In exceptional circumstances, users may report any such breach directly to the Headteacher, Chair of Governors or to Audit Services.

Although the above roles have been explicitly identified, the handling of secured data is everyone's responsibility.

9 Legislation

9.1 Background

The responsibilities referred to in the previous sections recognise the requirements of the current legislation relating to the use of ICT systems and information security, which comprise principally of:

- Data Protection Acts 1998
- Computer Misuse Act 1990
- Copyright, Designs and Patents Act 1988
- Freedom of Information Act 2000
- Human Rights Act 1998

It is important that all staff are aware that any infringement of the provisions of this legislation may result in disciplinary, civil and/or criminal action.

The general requirements arising from these Acts are in the appendices to this document – see page 31.

10 Management of the Policy

The Headteacher should allocate sufficient resources each year to ensure the security of the school's information and ICT systems and to enable users to comply fully with the legal requirements and policies covered in this Policy. If insufficient resources are available to fully implement this policy, then the potential risks must be documented and reported to Governors.

The Headteacher must ensure that adequate procedures are established in respect of the ICT security implications of personnel changes. Suitable measures should be applied to provide for continuity of ICT security when staff vacate or occupy a post. These measures as a minimum must include:

- a record that new staff have been issued with, have read the appropriate documentation relating to information and ICT security, and have signed the list of rules;
- a record of the access rights to systems granted to an individual user;
- a record that those rights have been amended or withdrawn due to a change to responsibilities or termination of employment.

11 Physical Security

11.1 Location Access

Adequate consideration should be given to the physical security of rooms containing sensitive information and ICT equipment (including associated cabling). As far as practicable, only authorised persons should be admitted to rooms that contain servers or provide access to data.

The SIRO must ensure appropriate arrangements are applied for the removal of any ICT equipment from its normal location. These arrangements should take into consideration the risks associated with the removal and the impact these risks might have.

All school owned ICT equipment should be recorded and security-marked. Advice on security marking is available from Shropshire Council's Crime Prevention Officer

Power supply protection from voltage surges will prevent servers from failing. Uninterruptible Power Supply (UPS) units will ensure a controlled shutdown of servers should a power failure occur. Uninterruptible Power Supply units are also recommended for network cabinets which contain sensitive equipment, ie Cisco network switches.

11.2 Siting of Equipment

Reasonable care must be taken in the siting of computer screens, keyboards, printers or other similar devices. Wherever possible, and depending upon the sensitivity of the data, users should observe the following precautions:

- Information (paper or electronic) should be protected in such a way that it cannot be accessed or viewed by persons not authorised to access it.
- devices should be positioned in such a way that information stored or being processed cannot be viewed by persons not authorised to know the information. Specific consideration should be given to the siting of devices on which confidential or sensitive information is processed or retrieved;
- equipment should be sited to avoid environmental damage from causes such as dust and heat;
- users should enable password protected screen savers to protect screen content if unauthorised access to the data held can be gained when left unattended
- a 'clear desk policy' should be adopted, ie hard copies of sensitive data are not left unattended on desks;
- network servers and infrastructure should be located in a temperature controlled, secure environment. If temperature control is not feasible, then the room should be well ventilated.

The same rules apply to official equipment in use at a user's home.

Storage and access to paper/manual information should be sited in such a way.

Physical Security – Checklist

✓	Set up password protected screen savers for staff access
✓	Adopt a clear desk policy
✓	Position computer screen so that information displayed cannot be read by an unauthorised person
✓	Ensure server rooms are secure and well ventilated
✓	Sensitive or personal information should not be left on a computer screen whilst a teacher is away from the PC
✓	Sensitive or personal information should not be projected in a classroom environment

12 Inventory

The SIRO, in accordance with the School's Financial Regulations, shall ensure that an inventory of all ICT equipment (however financed) is maintained and all items accounted for at least annually.

A current and up to date software inventory should also be maintained.

See page 39 for a sample form to record the disposal of assets.

12.1 Personal Hardware and Software

Dangers can occur from the use of unlicensed software and software infected with a computer virus. It is therefore vital that any private software permitted to be used on the school's equipment is acquired from a responsible source and is used strictly in accordance with the terms of the licence. The use of all personal hardware and software for school purposes must be approved by the SIRO.

Many free to use pieces of software may require payment for business use. The SIRO must be satisfied that use is permitted or paid for where required.

Inventory – Checklist

✓	Keep an up to date hardware inventory
✓	Keep an up to date software inventory
✓	Keep a record of equipment disposals

13 System Security

Any contractors or third parties who require access to the school's ICT systems for support or other reasons, should sign the agreement "Access to Systems and Facilities by Contractors" before access is granted.(see appendices, page 38)

Also see page 24 for guidance notes for adults working with young people.

13.1 Legitimate Use

The school's ICT facilities must not be used in any way that breaks the law or breaches Council standards.

Such breaches include, but are not limited to:

- making, distributing or using unlicensed software or data;
- making or sending threatening, offensive, or harassing messages;
- creating, possessing or distributing obscene material;
- unauthorised private use of the school's computer facilities.

13.2 ICT Security Facilities

The school's ICT systems and data will be protected using appropriate security arrangements outlined below. In addition consideration should also be given to including appropriate processing controls such as audit trails, input validation checks, control totals for output, reports on attempted unauthorised access, etc.

Administrative and curriculum network traffic is separated by the use of virtual LANs (Vlans) across the broadband network. Schools wishing to allow cross network traffic must ensure that there are adequate security measures in place to preserve the confidentiality, integrity and availability of sensitive data.

If Wireless LANs are implemented, they must be configured for encryption of network traffic and with no broadcast to prevent unauthorized access to school data. Encryption passwords should be stored securely by the SIRO. Administrative PCs should not be accessible via wireless networking unless there is an approved managed wireless solution in place providing authenticated access to secure data.

13.3 Authorisation

Only persons authorised by the SIRO, are allowed to use the school's ICT systems. The authority given to use a system will be sufficient but not excessive and the authority given must not be exceeded.

Failure to establish the limits of any authorisation may result in the school being unable to use the sanctions of the Computer Misuse Act 1990. Not only will it be difficult to demonstrate that a user has exceeded the authority given, it will also be difficult to show definitively who is authorised to use a computer system.

All ICT systems should display a message to users warning against unauthorised use of the system.

Access eligibility will be reviewed continually, including remote access to systems and external web services, eg S2S. In particular the relevant access capability will be removed when a person leaves the employment of the school or their role changes. In addition, access codes, user identification codes and authorisation rules will be reviewed whenever a user changes duties.

Failure to change access eligibility and passwords will leave the ICT systems vulnerable to misuse.

See page 36 for a sample “Checklist for Leavers” document

13.4 Access to the Council Services

The SIRO must seek permission on behalf of the school for any ICT user to access Council services.

In the school environment this currently applies to the access granted in schools to the Council’s Samis finance system (contact the Payments Team on (01743) 252654) or the ResourceLink HR system (contact the Payroll team on (01743) 252088).

13.5 Passwords

Passwords protect access to ICT systems.

All accounts with “administrator” rights should have strong passwords. The recommendation for strong passwords is a minimum of 16 characters, using a combination of upper and lower case, numbers and symbols

The level of password control will be defined by the SIRO based on the value and sensitivity of the data involved, including the possible use of “time out” passwords where a device is left unused for a defined period.

Power on passwords are recommended for mobile devices, particularly laptops highly portable and less physically secure.

Default passwords must be changed the first time a system is used.

Passwords should be memorised. If an infrequently used password needs to be written, this record must be stored securely. Users should be advised about the potential risks of written passwords and should be given clear written instructions on the safeguards to adopt.

Passwords should not be obvious or guessable and their complexity should reflect the value and sensitivity of the systems and data involved, ie ‘master user’ passwords are more critical. Users should be instructed on appropriate techniques for selecting and setting a new password.

Passwords should be changed frequently to previously unused passwords. Many systems have the capability to prompt or force the user to periodically select a new password. The SIRO should decide on the appropriate duration that users could leave their password unchanged.

A typical password change frequency is termly. The interval chosen and the methods by which the password changes will be enforced must be suitably documented for users.

A password must be changed if it is affected by a suspected or actual breach of security or if there is a possibility that such a breach could occur, such as:

- when a password holder leaves the school or is transferred to another post;
- when a password may have become known to a person not entitled to know it.

The need to change one or more passwords will be determined by the risk of the security breach.

Users must not reveal their password to anyone. Users who forget their password must request the SIRO issue a new password.

Where a password has to be shared, eg to power on a device or access an internal network, users must take special care to ensure that it is not disclosed to any person who does not require access to the device or network.

Finally, do not save passwords in web browsers if offered to do so.

13.6 Backups

In order to ensure that essential services and facilities are restored as quickly as possible following an ICT system failure, backup copies of stored data will be taken at regular intervals as determined by the SIRO, dependent upon the importance and quantity of the data concerned.

A recommended backup strategy is detailed in the appendices – see page 28. The SITSS team offer an online backup service to schools – see page 29

Security copies should be clearly marked as to what they are and when they were taken and stored away from the system to which they relate in a restricted access fireproof location and/or off site.

Security copies should be regularly tested to ensure that they enable the systems/relevant file to be reloaded in cases of system failure.

13.7 Virus Protection

The SIRO will ensure current and up to date anti-virus software is applied to all school ICT systems.

The SITSS team offer a centralized anti-virus service – see page 29

The SIRO will ensure operating systems are updated with critical security patches as soon as these are available and ensure that there is a mechanism in place for ensuring that there is a mechanism for keeping all operating systems up to date.

The SIRO will ensure that where personal equipment, eg pupil or staff owned PDA, laptop, is brought into school, there is a clear policy regarding the minimum security measures required before the connection of such devices to the school network.

It is the school's responsibility to ensure that all school owned equipment is managed so that anti virus and critical security updates are applied in a timely manner.

All users take precautions to avoid malicious software that may destroy or corrupt data, eg checking all incoming email attachments or internet downloads for malicious software before use, and should be made aware of how to recognise and handle email hoaxes.

The school will ensure that every ICT user is aware that any suspected or actual computer virus infection must be reported immediately to the SIRO who must take appropriate action, including removing the source of infection. In the event of SITSS notifying the school of a virus infection on the school network, the machine(s) must be disconnected immediately and appropriate action taken before reconnection.

13.8 Disposal of Information and Equipment

Disposal of waste information and ICT media such as print-outs, CDs, memory sticks and magnetic tape will be carried out in a secure manner to ensure that the information contained cannot be recovered or reconstructed. For example, paper and CDs will be shredded if any confidential information from them could be derived.

The Data Protection Act requires that personal information is disposed of securely..

Prior to the transfer or disposal of any ICT equipment the SIRO must ensure that any personal data or software is obliterated from the machine if the recipient organisation is not authorised to receive the data. Where the recipient organisation is authorised to receive the data, they must be made aware of the existence of any personal data to enable the requirements of the Data Protection Act to be met.

A sample form to record the disposal of assets is provided on page 39.

It is important to ensure that any copies of the software remaining on a machine being relinquished are legitimate. Care should be taken to avoid infringing software and data copyright and licensing restrictions by supplying unlicensed copies of software inadvertently.

The SIRO must ensure the requirements of the Waste from Electronic and Electrical Equipment (WEEE) Directive are observed.

The Council's IT Procurement Framework provides for suppliers to collect and dispose of redundant school ICT equipment in accordance with the WEEE Directive.

13.9 Repair of Equipment

If a machine, or its permanent storage (usually a disk drive), is required to be repaired by a third party the significance of any data held must be considered. If data is particularly sensitive it must be removed from hard disks and stored on other media for subsequent reinstallation.

System Security – Checklist

✓	Ensure any contractor or third party signs the form "Access to Systems by Third Parties" before access is granted
✓	Establish Acceptable Use Policies and ensure that these are issued to all users
✓	Set rules governing the use of private hardware and software
✓	Ensure access granted to users is sufficient
✓	Establish a leavers' procedure to ensure that accounts are deleted when users leave
✓	Enforce strong passwords where appropriate
✓	Ensure all school owned machines are managed so that AV and critical security updates are applied in a timely manner
✓	Ensure disposal is carried out in a secure manner as appropriate and that equipment disposals are recorded

14 Good Practice in Information Handling

14.1 Background

Following a number of high profile personal data losses from government departments, policies have been issued aimed at putting in place core protective measures, getting the working culture right and improving accountability and scrutiny of performance. In addition, the Information Commissioner has the power to fine organizations up to £0.5 million for personal data loss.

Good practice guides to support schools in reviewing their data handling procedures are available:

- Information risk management and protective marking
- Secure remote access
- Data Encryption
- Audit logging and incident handling

Every school holds personal data on learners, staff and others. Information security is everyone's responsibility and needs to be embedded into the culture and ways of working.

Personal data is any combination of data items that identifies an individual and gives specific information about them, their families or their circumstances. This includes names, contact details, gender, dates of birth, behavior and assessment records. The Data Protection Act 1998 specifies additional data items as "sensitive personal data" including medical records, criminal convictions and ethnic origin.

14.2 Risk Assessment

It is recommended that every school undertakes a thorough risk assessment on the information assets held. This will help identify what security measures are already in place and whether they are the most appropriate (and cost effective) available. Carrying out an information risk assessment will generally involve:

- Recognizing which risks are present
- Judging the size of the risk(s)
- Prioritising the risks

Once the risks have been assessed, a decision can be made on how to reduce them or accept them.

Risk assessment is an ongoing process and schools will need to review these at regular intervals as risks change over time.

14.3 Encryption

Schools should use encryption to help maintain the security of the personal data they hold on learners, staff and others and if sensitive or personal information is held on a mobile device, then this must be encrypted.

Please see Appendix 29 for encryption services offered by the SITSS team.

Data Handling – Checklist

✓	Appoint a Senior Risk Information Officer (SIRO)
✓	Identify information assets and for each one, identify an Information Asset Owner (IAO)
✓	Conduct data security training for all users
✓	Put in place a policy for reporting, managing and recovering from incidents which put information at risk
✓	Shred, pulp or incinerate paper when no longer required
✓	Make staff and learners (and parents where applicable) aware of what data is being held about them and what it is being used for by issuing privacy or fair processing notices
✓	Encrypt media that contains personal data that is to be removed from site or from the organization
✓	Make sure that, where appropriate, contracts for employment state that misuse of such data is a disciplinary matter

15 Security Incidents

All suspected or actual breaches of information or ICT security, including the detection of computer viruses, must be reported to the SIRO, or the Headteacher in their absence, who should report the incident to the ICT Services Help Desk (01743 252200).

Security Incidents – Checklist

✓	If you suspect a computer has been used inappropriately, do not turn off or allow anyone to access the computer as it may affect importance evidence
✓	Make sure all suspected or actual security breaches are reported

WMnet E-safety – Sample Acceptable Use Policies for Schools

AUP Guidance notes for learners in KS1

I want to feel safe all the time.

I agree that I will:

- always keep my passwords a secret
- only open pages which my teacher has said are OK
- only work with people I know in real life
- tell my teacher if anything makes me feel scared or uncomfortable on the internet
- make sure all messages I send are polite
- show my teacher if I get a nasty message
- not reply to any nasty message or anything which makes me feel uncomfortable
- not give my mobile phone number to anyone who is not a friend in real life
- only email people I know or if my teacher agrees
- only use my school email
- talk to my teacher before using anything on the internet
- not tell people about myself online (I will not tell them my name, anything about my home and family and pets)
- not upload photographs of myself without asking a teacher
- never agree to meet a stranger

Anything I do on the computer may be seen by someone else.

I am aware of the CEOP report button and know when to use it.

AUP Guidance notes for learners in KS2 and KS3

When I am using the computer or other technologies, I want to feel safe all the time.

I agree that I will:

- always keep my passwords a secret
- only use, move and share personal data securely
- only visit sites which are appropriate
- work in collaboration only with people my school has approved and will deny access to others
- respect the school network security
- make sure all messages I send are respectful
- show a responsible adult any content that makes me feel unsafe or uncomfortable
- not reply to any nasty message or anything which makes me feel uncomfortable
- not use my own mobile device in school unless I am given permission
- only give my mobile phone number to friends I know in real life and trust
- only email people I know or approved by my school
- only use email which has been provided by school
- obtain permission from a teacher before I order online
- discuss and agree my use of a social networking site with a responsible adult before joining
- always follow the terms and conditions when using a site
- always keep my personal details private. (my name, family information, journey to school, my pets and hobbies are all examples of personal details)
- always check with a responsible adult before I share images of myself or others
- only create and share content that is legal
- never meet an online friend without taking a responsible adult that I know with me

I am aware of the CEOP report button and know when to use it.

I know that anything I share online may be monitored.

I know that once I share anything online it is completely out of my control and may be used by others in a way that I did not intend.

AUP Guidance notes for learners in KS3 and above

The policy aims to ensure that any communications technology is used without creating unnecessary risk to others.

I agree that I will:

- only use, move and share personal data securely
- respect the school network security
- set strong passwords which I will not share
- not use my own mobile device in school unless I am given permission
- respect copyright and the intellectual property rights of others
- only create and share content that is legal
- always follow the terms and conditions when using a site
- only visit sites which are appropriate
- discuss and agree my use of a social networking site with a responsible adult before joining
- obtain permission from a teacher before I order online
- only use approved email accounts
- only use appropriate content which I have permission to use
- only communicate online with trusted users
- never meet an online friend without taking a responsible adult that I know with me
- make sure all messages/posts I send are respectful
- not respond to or forward any inappropriate message or content
- be cautious when sharing personal contact information
- only communicate electronically with people I know or have been approved by my school
- report unsuitable content or activities to a member of staff

I know that anything I share online may be monitored.

I know that once I share anything online it is completely out of my control and may be used by others in a way that I did not intend.

I am aware of the CEOP report button and know when to use it.

Continued...

I agree that I will not:

- visit Internet sites, make, post, download, upload or pass on, material, remarks, proposals or comments that contain or relate to:
 - pornography (including child pornography)
 - promoting discrimination of any kind
 - promoting violence or bullying
 - promoting racial or religious hatred
 - promoting illegal acts
 - breach any Local Authority/School policies, e.g. gambling
 - do anything which exposes children in my care to danger
 - any other information which may be offensive to others
 - forward chain letters
 - breach copyright law
 - do anything which exposes others to danger

I accept that my use of the school and Local Authority ICT facilities may be monitored and the outcomes of the monitoring may be used.

AUP Guidelines for any adult working with learners

The policy aims to ensure that any communications technology is used without creating unnecessary risk to users whilst supporting learning.

Please check that this is compatible with your local authority policies before using this AUP.

I agree that I will:

- only use, move and share personal data securely
- respect the school network security
- implement the schools policy on the use of technology and digital literacy including the skills of knowledge location, retrieval and evaluation, the recognition of bias, unreliability and validity of sources
- respect the copyright and intellectual property rights of others
- only use approved email accounts
- only use pupil images or work when approved by parents and in a way that will not enable individual pupils to be identified on a public facing site.
- only give permission to pupils to communicate online with trusted users.
- use the ICT facilities sensibly, professionally, lawfully, consistent with my duties and with respect for pupils and colleagues.
- not use or share my personal (home) accounts/data (eg Facebook, email, ebay etc) with pupils
- set strong passwords which I will not share and will change regularly (a strong password is one which uses a combination of letters, numbers and other permitted signs).
- report unsuitable content and/or ICT misuse to the named e-Safety officer
- promote any supplied E safety guidance appropriately.

I know that anything I share online may be monitored.

I know that once I share anything online it is completely out of my control and may be used by others in a way that I did not intend.

Continued...

I agree that I will not:

- visit Internet sites, make, post, download, upload or pass on, material, remarks, proposals or comments that contain or relate to:
- pornography (including child pornography)
- promoting discrimination of any kind
- promoting violence or bullying
- promoting racial or religious hatred
- promoting illegal acts
- breach any Local Authority/School policies, e.g. gambling
- do anything which exposes others to danger
- any other information which may be offensive to others
- forward chain letters
- breach copyright law
- use personal digital recording equipment including cameras, phones or other devices for taking/transferring images of pupils or staff without permission
- store images or other files off site without permission from the head teacher or their delegated representative.

I will ensure that any private social networking sites, blogs, etc that I create or actively contribute to, do not compromise my professional role.

I understand that data protection policy requires me to keep any information I see regarding staff or pupils which is held within the school's management information system private, secure and confidential. The only exceptions are when there is a safeguarding issue or I am required by law to disclose such information to an appropriate authority.

I accept that my use of the school and Local Authority ICT facilities may be monitored and the outcomes of the monitoring may be used.

AUP Guidance notes for schools and governors

The policy aims to ensure that any communications technology (including computers, mobile devices and mobile phones etc.) is used to supporting learning without creating unnecessary risk to users.

Please check that this is compatible with your local authority policies before using this AUP.

The governors will ensure that:

- learners are encouraged to enjoy the safe use of digital technology to enrich their learning
- learners are made aware of risks and processes for safe digital use
- all adults and learners have received the appropriate acceptable use policies and any required training
- the school has appointed an e-Safety Coordinator and a named governor takes responsibility for e-Safety
- an e-Safety Policy has been written by the school, building on the LSCB e Safety Policy and BECTA guidance
- the e-Safety Policy and its implementation will be reviewed annually
- the school internet access is designed for educational use and will include appropriate filtering and monitoring
- copyright law is not breached
- learners are taught to evaluate digital materials appropriately
- parents are aware of the acceptable use policy
- parents will be informed that all technology usage may be subject to monitoring, including URL's and text
- the school will take all reasonable precautions to ensure that users access only appropriate material
- the school will audit use of technology (using the Self-Review Framework) to establish if the e-safety policy is adequate and appropriately implemented
- methods to identify, assess and minimise risks will be reviewed annually
- complaints of internet misuse will be dealt with by a senior member of staff

Sample Acceptable Use Policy for Parents and Carers (Online Reporting)

Introduction

The school provides parental/carer access to information held about their child in the school's database system (referred to below as 'the system'). The information is provided on a read-only basis and cannot be changed by the viewer. Information is provided on the following areas:

- Attendance and behaviour
- Progress and attainment
- Special needs

Security

Access to the system is through the use of a username and password provided by the school to you on an individual basis. It is your responsibility to keep the username and password confidential and to ensure it is not disclosed to any other person.

Please remember that you are responsible for protecting the data you are using from access by any third party.

This policy is intended to minimise security risks. In particular these risks arise from:

- The intentional or unintentional disclosure of login credentials
- The wrongful disclosure of private, sensitive and confidential information.
- Data used in such a way which may bring the school or Council into disrepute

Authorised Users

- Access to the system is provided for use by persons who are legally responsible for pupil(s) currently attending the school.
- Access is granted only on condition that the individual formally agrees to the terms of this policy by signing and dating the policy.
- An authorising member of school staff will confirm that there is a legitimate entitlement to access information
- A copy of this form will be held by the school for audit purposes.

Personal Use

Information made available via the system is confidential and protected by law under the Data Protection Act 1998. To that aim:

- Users must not distribute or disclose any information obtained from the system.
- Users must ensure that, when working from home, other family members and friends cannot access the information
- Users should not attempt to access the system in any environment where the security of the information may be placed at risk eg a cybercafé or by using an unsecured wi-fi connection.
- All passwords must be kept confidential

- Any errors or inaccuracies in the data viewed should be notified to the school so that appropriate action can be taken

Password Policy

You assume personal responsibility for your username and password.
 The password can be changed as necessary in order to maintain security.
 (New passwords should be at least 8 characters long and contain a lowercase letter, and uppercase letter and a number or special character (shifted number).

Cancellation of access

The school reserves the right to revoke or deny access to the system for any individual in the following circumstances:

- The validity of parental responsibility is questioned.
- Court ruling preventing access to child or family members is issued.
- A user is found to be in breach of this policy.
- Any other reason deemed appropriate by the Senior Information Risk Officer, Headteacher or Chair of Governors

A username and password will not be issued unless the attached confirmation is signed and returned to the school

I accept the terms of this policy and request the issue of a username and password:

Parent/Carer of (pupil name):	1	Tutor Group:
	_____	_____
	2.	_____
	_____	_____
	3.	_____
	_____	_____

Signed	_____	Please Print Name	_____
Date	_____		_____

Services available from the SITSS team

The SITSS team offer a number of Service Level Agreements (SLAs) and supplementary services to assist and support the use of ICT in schools including:

Infrastructure Services

The following services are available to schools subscribing to the Infrastructure Services Service Level Agreement:

- Unlimited first line Help Desk support for centralised applications on the Shropshire schools' network, eg Sophos anti virus solution*, technical support for corporate applications (Samis and ResourceLink), video conferencing
- Broadband circuit faults
- Content filtering
- Shropshire Learning Gateway
- Technical support for Espresso
- Bandwidth and traffic monitoring on the schools' network
- Technical support and consultancy, including telephone advice but excluding on site support
- Access to the procurement service and the Council's finance scheme
- Access to the online backup service
- Access to technical events and technical training courses
- Access to online information provided by the SITSS team

*Licence costs for the Sophos software are recharged separately

Online backup

An automated remote data backup solution is available to schools via the SITSS team. Synetrix Securestore™ is a fully managed and supported automated data backup and storage service. The backup starts automatically and compresses, encrypts and packs the data ready for transfer to the Synetrix data centre. Changes to the data from the previous backup are transmitted securely and safely. No more tapes, backup hardware or fuss.

Centralised Anti Virus

All schools have access to the central anti virus solution provided by the SITSS team. Support for this service is included as part of the Infrastructure Services SLA with the SITSS team. Licence costs for the Sophos software are recharged separately by the Children and Young People's Service.

Encryption

Sophos Endpoint and Data Security software which provides full hard disk encryption has been successfully tested by the SITSS team and licences have been purchased for use by schools.

The SITSS order form provides an option for hard disk encryption. This should be selected when ordering laptops which may store personal/ confidential data. For users with existing laptops, the same encryption software can be used and schools are advised to contact the schools' support desk on (01743) 254230 if they are interested in this service

Switch Maintenance

Switch maintenance is available to those schools subscribing to the Infrastructure Services SLA. Subscription to the SITSS switch maintenance scheme provides schools with “insurance” against the main network switch failing as follows:

- An 8 hour response to switch problems including swap out where necessary
- Cisco 2950-24, 2950G-24, 2950G-48, 2960G-24, 2960G-48 and 3750 switches installed by Stoneleigh Consultancy are eligible.
- Cisco 3524-XL-EN, 3548-XL-EN and 3508G switches (installed by GGR Communications or Stoneleigh Consultancy) are also eligible but, as these switches are no longer covered by Cisco’s own warranty, a premium is applied to reflect the age of the equipment and the probability of failure.
- Other Cisco switches may not be eligible
- Cisco switches purchased from other third party vendors are not eligible
- Other manufacturer’s switches are not eligible
- All technician costs associated with the diagnosis and swap out are covered by the annual maintenance payment
- All courier costs associated with the service are covered by the annual maintenance payment

Legislation

Data Protection Act 1998

A school, like every other data user, must conform to the requirements of the Data Protection Act (1998). In particular this requires the school to formally notify the Information Commissioner of:

- the purposes for which the school holds personal data;
- what data it holds;
- the source of the data;
- to whom the data is disclosed.

Under the Act, each school is a separate data user and must complete a “Notification” each year.

It is important that all users of personal data are aware of, and are reminded periodically of, the requirements of the act and, in particular, the limitations on the storage and disclosure of information.

Computer Misuse Act 1990

Under the Computer Misuse Act 1990 the following are criminal offences, if undertaken intentionally:

- unauthorised access to a computer system or data;
- unauthorised access preparatory to another criminal action;
- unauthorised modification of a computer system or data.

Copyright, Designs and Patents Act 1988

The Copyright, Designs and Patents Act 1988 provides the legal basis for the protection of intellectual property which includes literary, dramatic, musical and artistic works. The definition of “literary work” covers computer programs and data.

Where computer programs and data are obtained from an external source they remain the property of the originator. Our permission to use the programs or data will be governed by a formal agreement such as a contract or license.

All copying of software is forbidden by the Act unless it is in accordance with the provisions of the Act and in compliance with the terms and conditions of the respective license or contract.

The School is responsible for compiling and maintaining an inventory of all software held, including freeware and shareware, and for checking it at least annually to ensure that software licenses accord with installations. To ensure that the school complies with the Copyright, Designs and Patents Act 1988 users must get prior permission in writing from their SIRO (or nominated person) before copying any software.

Freeware or shareware software should be registered as required with the software supplier and is generally provided on an unsupported basis. Schools need to be extremely cautious in accepting free downloadable software over the internet. Very

often free software also loads malware software onto the PC. Malware resides and hides on computers, often reporting back to advertising companies or other data capture firms that build up a profile of internet browsing habits.

Users should read all licence agreements very carefully before accepting the terms and conditions and, if in any doubt, should not accept the licence conditions/download.

All users must be given written notice that failure to comply with the provisions of the Act will be regarded as a breach of school policy and may be treated as gross misconduct and may also result in civil or criminal proceedings being taken.

Freedom of Information

The Freedom of Information Act (FOI) came into force on 1st January 2005. This means that members of the public and organisations have rights of access to information held by public bodies. Upon request we must tell individuals if we hold information and if so, provide it within 20 working days.

The principle behind the Act is that all information held in any format is accessible, unless certain conditions or exemptions apply.

Further information on the Act and the application of exemptions is available on SchoolsNet/Learning Gateway.

If an individual is not satisfied with our response, or if we do not respond within the 20 working days, they can request a review of the request. If they are not satisfied with the review process they can make a complaint to the Information Commissioner's Office.

A request can be given to any employee of the Council. Once a request is received you need to know what to do with it and act upon it immediately. All staff will need to make sure they know how the procedures affect them.

Human Rights

As a public authority, the school must act in a way that is compatible with and promotes individuals' rights in accordance with the Human Rights Act 1998.

Further information is available via the following weblink:
<http://www.justice.gov.uk/guidance/humanrights.htm>

Definitions

Definitions of Personal Information and Sensitive Personal Information for this purpose are:-

Personal data: Information that is sufficient to identify a living individual by itself or in conjunction with other information held by the school. Includes any expression of opinion about an individual and any indication of the intentions of the school or any other person in respect of the individual.

Sensitive personal data: Defined in the Data Protection Act 1998 as information about an individual relating to physical/mental health, criminal proceedings, ethnicity, sexual life, trade union, political opinions or religious beliefs.

Other data that should be protected includes: national insurance number, bank account details, credit card details, identification credentials and protected whereabouts.

Secure Remote Access

Schools should use secure remote access technology, where appropriate, to secure the personal data of learners, staff or any other authorised users.

Essential components of secure remote access include:

- Authentication – who or what system is trying to connect, ensuring that the user and the computer at each end are who they say they are
- Authorisation – ensuring that the user at the remote end is authorized to access the data
- Geographical restrictions – personal data may not be accessed remotely unless encrypted and access may require specific network connections
- Encryption – to secure personal data in transit, and file or full disk encryption for any storage media that holds personal data
- Audit – logs of access to secured data

E-Mail

Recommendations for email users:

- Ensure you have read the Acceptable Use Policy
- Report any spam or phishing emails to the appropriate contact in your school, eg SIRO, ICT co-ordinator, network manager
- If you don't know the sender of an unsolicited email, delete it without opening it
- Don't click on links in unsolicited emails and be especially wary of emails requesting or asking confirmation of any personal information, such as passwords, bank details etc
- Don't turn off any email security measures that your school has implemented or recommended
- Never respond to any spam message or click on any links in the message
- Don't use the preview function for your Inbox
- When sending email messages to a large number of recipients, use the blind copy (BCC) field to conceal their email addresses
- Think carefully before providing your email address on websites, newsgroup lists or other online public forum
- Never give your primary email address to anyone or any site you don't trust
- Do not take part in email chain letters
- Do not include indecent, inappropriate, offensive or profane content in any email

LEAVERS– CHECKLIST FOR MANAGERS

Please complete this checklist as appropriate, ensuring it is signed, dated and returned to the SIRO for audit purposes. If you are uncertain about any aspects of the checklist or require further explanation, please contact the SIRO. Please note it is your responsibility to ensure that the items below are returned as detailed.

Employee Name		Employee No	
School		Post No	
Post Title		Leaving Date	

Please ensure return of:	Tick	Initials
ID/Security Badge returned	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Uniform/Protective Clothing	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
School Property (keys, personal alarm etc)	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
School data (paper files, CDs, removable media etc)	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
School hardware (laptop, PC, mobile phone, memory stick etc)	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Service/contract considerations	Tick	Initials
Alarm/door system – is code change required?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Key Holder – consider new arrangements?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Alert contractors to new contact arrangements?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Consider First Aid / Fire Warden requirements?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
IT considerations	Tick	Initials
SIMS database amended	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Email account(s) disabled	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Active Directory Account disabled	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	
Access to external websites disabled (SLG, S2S etc)	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>	

This declaration is to be signed by the employee and line manager to confirm that all school equipment and information has been returned or destroyed as appropriate. Please understand that the school will seek to recover any claims/damages made against them as a result of inappropriate use of information.

The employee confirms that all personal information has been removed and all business information transferred from the employee’s email account(s) and computer network folder(s).

Recommended Backup Strategy

1. **All** administrative data should be backed up daily.
 - a. Primary schools are recommended to have a cycle of five backup tapes, one for each day of the week (Monday to Friday). Therefore, at least five copies of the data will always be available.
 - b. Secondary schools are recommended to have a cycle of eight backup tapes: one for each day of the week (Monday to Thursday) with Friday's tapes kept for 4 weeks.
2. **All** curriculum data should be backed up daily. Therefore, at least five copies of the data will always be available.
3. At least one of the backups should be kept away from the school premises (in case of fire or theft).
4. All backups should be checked to ensure that they have been successful. For example, if a backup has been made to a tape, the contents of the tape should be checked to see that a file, or files exist, and that their date of creation is consistent with the date of the backup.
5. A 'Long Term Backup' should be taken at the beginning of each term. This should be kept and not overwritten until the beginning of the next term. This will help protect against data corruption that goes unnoticed for several weeks, during which 'older' backups will have been overwritten by 'newer' ones.
6. Differing media are employed in schools for backing up purposes, eg magnetic tapes, hard disks, zip drives. If you suspect your principal backup medium is not working correctly (tape drives can be notoriously unreliable), use an alternative, until a member of SITSS has visited to correct the problem.
7. If possible, use more than one medium for backup anyway. For network users, the option to record onto workstation hard disks is always available. Do this as well as tape and floppy disk backup.
8. Backup tapes do wear and it is recommended that tapes are replaced termly.
9. Cleaning tapes should be used weekly and, again, it is recommended that they are replaced termly.
10. If you are unsure about your backups - please telephone the schools' support desk on (01743) 254230 and check whether or not your current processes are adequate and reliable.
11. Please contact the SITSS team for information on the online backup service

Access to Systems or Facilities by Contractors

This agreement should be signed by all contractors accessing Council systems or facilities prior to access being granted.

By signing this form you are agreeing:

- to comply with the Council's Information Security Policy and procedures and take all necessary steps to ensure the security integrity and confidentiality of all data and other information held by the Council to which you shall have access
- to conform with the provisions of all relevant legislation inclusive of but not limited to the Data Protection Act 1998, Copyright Designs and Patents Act 1988, Computer Misuse Act 1990 and all subsequent relevant legislation
- that you will not without the prior consent of the Council in writing divulge data or any other information provided to you by the Council or held by the Council to which you shall have access
- that you will take all reasonable precautions to ensure that viruses or other malicious software are not introduced onto or into the Council's IT facilities or systems
- that you will not without the previous consent of the Council in writing make any change or alteration to IT facilities or systems used by the Council
- that you will not access any of the Council's data information systems or facilities unless it is required to do so under the terms of the Contract and in any event not without the Council's prior consent in writing. This includes only accessing information or systems specified by the Council and in accordance with agreed times of access.
- will not disclose methods of access to facilities or systems to any person without the Council's prior consent in writing
- will not download the Council's accessed data or other information without the Council's prior consent in writing

The Contractor shall fully indemnify Shropshire County Council against all damages (excluding consequential damages), costs, charges and expenses arising from or incurred by its failure to comply with the above clauses and shall promptly notify Shropshire County Council in writing of any alleged infringement of which the Contractor has notice of. The Contractor will make no admissions of liability without Shropshire County Council's prior written consent. The provisions of this Clause shall survive the expiration or termination of this or any related Agreement.

Please sign below to acknowledge that you have read and understood this document and agree to the conditions therein.

Checklist

This checklist is designed to assist Headteachers ensure that personal information in either paper or electronic format is being managed appropriately.

It is the Headteacher's responsibility to:

- know how personal information is being used.
- approve what personal information leaves the school premises.
- ensure that staff are taking precautions to ensure that personal information is appropriately protected.

Checklist	
Check with staff if they take personal information or equipment away from school.	<input type="checkbox"/>
Does personal information need to be taken off site?	<input type="checkbox"/>
Is the amount of personal information leaving the school limited to that which is actually needed, ie data isn't left on memory sticks or laptops if it is not specifically required?	<input type="checkbox"/>
Personal data isn't stored on memory sticks or laptops unless the devices are encrypted. The Information Commissioner's Office does not consider password only protection to be sufficient.	<input type="checkbox"/>
When taken out of the school, personal information is going to be kept securely and access limited to the member of staff, either in transit or in the home environment.	<input type="checkbox"/>
Is anti-virus software and operating system software (Windows/Mac) kept up to date? At a minimum staff must ensure that laptops are updated as soon as they are returned to school. [The Council has previously suffered a serious incident affecting the whole school network as a result of computer software not being kept up to date over a Summer break].	<input type="checkbox"/>
If school computer equipment is being taken home, access to the computer is restricted to the member of staff's usage.	<input type="checkbox"/>
Personal photographs, music, video, non-school software should not be stored on a school computer.	<input type="checkbox"/>
Staff are aware that they should use the computer in the home environment as they would at school, in line with any school 'appropriate usage' guidance.	<input type="checkbox"/>
When the school is closed personal information and portable computer equipment remaining at school is secured out of sight.	<input type="checkbox"/>

If you require any advice in relation to data protection, Freedom of Information or information security issues, please contact the Information Governance team on 01743 252774/252179.
